

Clinic User

Objectives: At the completion of this section, the learner will know how to:

- assign chart numbers to patients in ImmPRINT
- generate a patient list
- perform clinic user functions
- complete additional tasks for HL7 sites

A clinic user is a clinic personnel delegated with the responsibility to administer and document patients' vaccinations. Medical authorities are professionals with a national provider identifier (NPI) number, who order and authorize the administration of vaccines at their practice. Medical authorities can have a clinic user account, but it is not required.

Assigning Chart Numbers

Clinic users should assign a chart number to their patients. The chart number is the unique identifier the clinic has for each individual patient (i.e. medical record number). After searching and selecting the correct patient, select the **Chart #/Follow Up** tab from the "Patient Details" page.

Name	DOB	Age	RegistryID
TES, TEST	01/23/1994	24 Yrs 2 Mo 26 days	(15919272)

[Patient Details](#) [Contact Info](#) [Parent Info](#) [Insurance Information](#) [Chart #/Follow Up](#) [Patient Notes](#)

If the "Chart #" box is empty, enter the patient's chart number in the indicated space.

Add	Chart #	Site Name	Follow-Up
	<input type="text"/>	IMMPRINT TEST CLINIC	ACTIVE

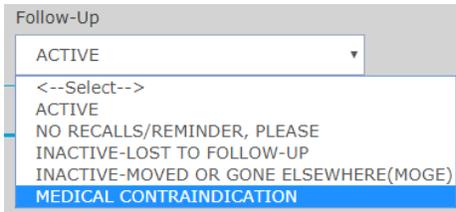

Alabama Department of Public Health

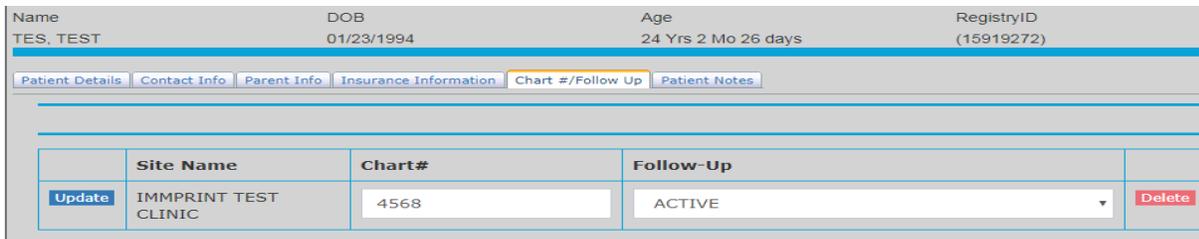

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 11/17/17

The user will also see a “Follow-up” drop down box. This field allows the user to notate patient information as well. See the image below.

Once complete select “Add”. If at any time this information needs to be modified, simply return to the **Chart #/Follow Up** tab to make the necessary corrections, and select “Update”.

Generating the Patient List

Once patients have been assigned a site in ImmPRINT, site users are able to view their Patient List”. From the Site Maintenance tab on the left side of the screen choose “Patient List”.

The “Patient List” page will appear showing the patients that are in ImmPRINT and assigned to the user’s site. The list defaults to showing only active patients, but users can compile a list showing inactive or both active and inactive patients. Once a selection has been made, click “Search”. Select “Cancel” to default back to showing active patients only.

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

From the generated list, users can further sort according to patient names, dates of birth, chart numbers, or exemption statuses. The three print buttons above the patient list allow users to easily print the indicated document for their entire list of patients. Users can also modify patient's statuses from this page by clicking on the dropdown arrow in the status column. When the change is made, select "Update".

Clinic User Functions

Document Patients' Vaccinations

The primary function of the clinic user is to accurately document patients' vaccine histories. Clinic users can document both administered and historical vaccinations. Please refer to the "Vaccine History" section of this manual for instructions on how to document vaccines.

View/Print Vaccination Resources

Clinic users have access to the Vaccine Forecaster, Patient/Parent Card, and COI, which assist clinic staff and users in providing the best care possible. After selecting the correct patient, the user can choose the desired document from the left side of the screen. We will briefly discuss each document's purpose.

Vaccine Forecaster

The vaccine forecaster is a document that shows the recommended vaccines for a patient based upon the vaccination history in ImmPRINT. The document lists the names and dates the vaccines were given. Each vaccine is evaluated as either valid, invalid, or accepted

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 11/17/17

according to Advisory Committee on Immunization Practices' (ACIP) recommendations. For invalid vaccines, the reason is displayed, and will not be counted towards meeting the vaccine series. Lastly, a list of recommended vaccines will be provided. Please note that the forecaster will always display recommendations according to ACIP, and does not change standards even if a patient has a medical and/or religious exemption. An example of the forecaster report is displayed below.

Certificate of Immunization (COI)

Clinic users can view and print an official and unexpired ADPH COI for patients under 21 years of age. Please note that the COI follows the immunization requirements according to Alabama School Law, and it only counts valid doses. You cannot print a COI if the patient is not up to date for school-required vaccines. After clicking on “Certificate of Imm (COI)”, users are able to see the pre-populated COI expiration date. A medical or religious exemption may affect the expiration date. Users are also able to print the patient’s parent or guardian information on the COI. Once users make the selections, click “Submit” to view and/or print the COI.

The screenshot shows a web form titled "Certificate of Imm (COI)". It contains the following fields and options:

Name	DOB	Age	RegistryID
DOE, JOHN	08/05/2011	6 Yrs 5 Mo 4 days	(14105868)

Below the table is a "Submit" button. A red warning message reads: "Invalid doses will not appear on COI (see forecaster). Medical and/or Religious exemptions noted at the school and/or child care center may affect the expiration date populated." Below this is a field for "Expiration Date" with the value "12/22/2028". There are two radio button options: "Print Parent or Guardian Info" with "No" selected, and "Print Temporary COI" which is unchecked.

Below is an example of an approved school COI. Notice the official ADPH seal transposed on the document and the ImmPRINT logo in the top left corner. COI’s printed from a school will have the ImmPRINT logo in the bottom left corner.

NOTES

A licensed physician or qualified employee of the Alabama Dept of Public Health is responsible for the content of this certificate. All dates must include the month, day, and year. In cases of history of disease or laboratory confirmation, the month and year of infection or test must be filled in the appropriate box(es).

The certificate is NOT valid without the name and birth date of the child, date of expiration, name and address of the physician or health department, and date of issue. A school or facility official is responsible for keeping a current valid Certificate on file for each child in attendance. When a child leaves or transfers to another facility, the Certificate of Immunization should be given to a parent/guardian.

Site Name : TEST ENROLLMENT CLINIC

Address: 12 MAIN STREET MONTGOMERY

Telephone #: (444) 5555555

Date of Issue: 1/9/2018

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 11/17/17

County Health Department clinic users can print a temporary COI, if necessary. On the Certificate of Imm (COI) page, check the “Print Temporary COI” box, and select “Submit”. The new expiration date will auto populate to reflect 10 days from the date issued.

Immunization Record

The Immunization Record provides a printout of the patient’s vaccination history. This report is to be used as a reference for clinic staff, and an example is provided below. Besides displaying the name and date the vaccine was given, it also lists clinical data such as the dose, site, vaccine lot and manufacturer information, and the clinic/vaccinator’s name.

If the vaccine was given at a different site, then the clinic/vaccinator name will only display “Outside Clinic”. If the clinic/vaccinator information is unavailable, it will state the clinic is “Unknown” or left blank.

Medical Exemptions

Clinic users at a facility with a licensed physician can provide a Certificate of Medical Exemption from school required immunizations. An approved Alabama Department of Public Health (ADPH) medical exemption form is accepted in lieu of a Certificate of Immunization (COI). Users are only able to issue medical exemptions for patients assigned to their clinic with a Chart #. To issue a medical exemption, the user must first search and select the correct patient. Click “Medical Exemption” on the left side of the screen. Although a site may be able to view and see the “Medical Exemption” tab, it does not mean it has the ability to issue medical exemptions. Sites that are not authorized to issue medical exemptions will receive the following message after selecting the “Medical Exemption” tab.

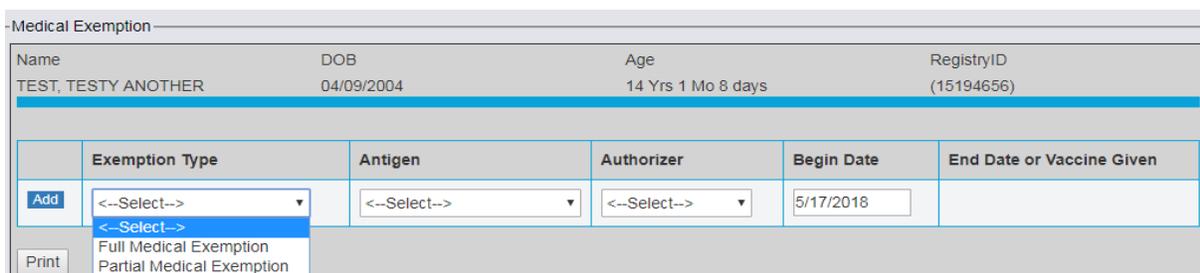

Medical Exemption

Name	DOB	Age	RegistryID
TEST, TES A	09/28/2003	14 Yrs 7 Mo 26 days	(15667618)

Medical Exemptions cannot be added by this site type.

Users at approved clinical sites should proceed with issuing a medical exemption using the following steps.

Medical Exemption

Name	DOB	Age	RegistryID
TEST, TESTY ANOTHER	04/09/2004	14 Yrs 1 Mo 8 days	(15194656)

	Exemption Type	Antigen	Authorizer	Begin Date	End Date or Vaccine Given
<input type="button" value="Add"/>	<--Select-->	<--Select-->	<--Select-->	5/17/2018	

- <--Select-->
- Full Medical Exemption
- Partial Medical Exemption

In the first column, the user must select the exemption type: partial or full exemption.

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 11/17/17

Exemption Type: Partial Medical Exemption

Antigen: <--Select-->

- <--Select-->
- DIPHTHERIA
- INACTIVATED POLIO
- MEASLES
- MMR
- MUMPS
- PERTUSSIS ACELLULAR
- RUBELLA
- TDAP
- TETANUS
- VARICELLA

Authorizer: <--Select-->

The user will need to select the indicated antigen. A full medical exemption does not require this step, as the administration of any vaccine is contraindicated for the patient. However, for partial exemptions, only one antigen can be chosen at a time.

Medical Exemption

Name	DOB	Age	RegistryID
TEST, TESTY ANOTHER	04/09/2004	14 Yrs 1 Mo 8 days	(15194656)

	Exemption Type	Antigen	Authorizer	Begin Date	End Date or Vaccine Given
<input type="button" value="Update"/>	Partial Medical Exemption	MMR	MEDICAL TEST	05/17/2018	<input type="text"/>
<input type="button" value="Add"/>	<--Select-->	<--Select-->	<--Select-->	5/17/2018	

Lastly, the user will select the medical provider authorizing the exemption. The date in the last column automatically defaults to the present date. After all information is entered, select “Add”. If another antigen needs to be added, the user will repeat the above step. When complete, select “Print” to obtain an approved ADPH medical exemption form. An example is provided below. Notice the exemption has the approved ADPH seal, and there is no expiration date.
